

Automation Execution Report

Project: Tichi Web Application - Login Module Automation

Author: Deepak S

Technology: Python 3.12, Selenium WebDriver, Pytest

Framework: Page Object Model (POM)

Browser: Google Chrome

Execution Summary

Metric	Value
Total Test Cases	7
Passed	7
Failed	0
Execution Status	PASS

Automated Test Cases

1. Launch Application - PASS
2. Valid Login - PASS
3. Invalid Password - PASS
4. Invalid Email Format - PASS
5. Unregistered Email - PASS
6. Empty Email - PASS
7. Both Fields Empty - PASS

Conclusion

All implemented login automation test cases executed successfully. The automation framework correctly validated positive and negative login scenarios and generated a successful execution report.
